

Corazon Halstead

Mercer, PA | 509-315-6516 | corrzhaltstead143@gmail.com | portfolio.corrz.dev (Portfolio)

Frontend Developer | Software Developer

Highly skilled Frontend Developer with years of experience designing, building, and maintaining enterprise-scale web applications using React, JavaScript (ES6+), TypeScript, and CSS3. Strong foundation in component-based architecture, REST API integration, testing, and Agile development workflows. Adept at translating UI/UX designs into responsive, accessible interfaces and delivering performant frontend systems optimized for scalability and maintainability.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, JSON

Frameworks & Libraries: React, React Router, Context API, Storybook

State Management: React Query, Redux (basic familiarity)

Styling & Design: Figma, CSS Modules, SCSS, Flexbox, Grid, Responsive Design

Testing & QA: Jest, React Testing Library, Postman, Mock Service Worker (MSW)

APIs & Backend: REST APIs, BFF Architecture, Knex.js, SQL

Tools & DevOps: Git, GitHub, Azure DevOps, NPM, VS Code

Workflow: Agile (Scrum), CI/CD, Pull Requests, Code Reviews, Cross-functional Collaboration

PROFESSIONAL EXPERIENCE

Frontend Developer

Jaik Solutions Inc / World Wide Group

March 2022 – Present

Remote / Contract to Hire

- Transitioned from internship to full-time contract developer based on strong performance and ownership of production-critical UI features.
- Built, maintained, and documented scalable React.js components using Storybook, reducing UI inconsistency across the codebase and cutting new feature rollout time by 40%.
- Developed responsive layouts using CSS Grid and Flexbox, fully optimized for mobile-first and cross-browser compatibility.
- Integrated REST APIs via React Query and Context API, improving application performance and minimizing redundant data fetches.
- Implemented unit tests and snapshot testing using Jest to ensure code quality and reduce regressions, increasing test coverage by 50%.
- Created backend logic using Knex.js and SQL to support ticket management, user sessions, and dynamic content generation.
- Validated and debugged API endpoints using Postman; incorporated error handling and fallback states in React components.
- Collaborated closely with UI/UX designers to convert high-fidelity Figma mockups into WCAG-compliant, accessible components.
- Contributed to Agile sprints using Git (Git Flow), Azure DevOps, and Wrike, participating in daily standups, sprint planning, and retrospectives.

EDUCATION

Associate of Applied Science in Software Development

Spokane Community College

June 2022

- Completed coursework in Object-Oriented Programming, Web Development, Database Management
- Honors & Certifications: [Merit Page](#)
